San Diego, CA

My name is Jake & I'm a San Diego based fullstack developer fluent in full-stack application development. I specialize in react-on-rails applications & modern web development. I bring a wealth of past work experience to bear, which allows me to effectively communicate with a variety of stakeholders & approach problems from unconventional angles.

Javascript
React
PHP
Ruby
Ruby on Rails
Python
Flask
TensorFlow
Postgresql
MongoDB
AWS DynamoDB
AWS RDS
HTML5 & CSS3
Git & Gitflow
Pair Programming
Adobe Photoshop

Software Engineer @ WOWYOW inc.
San Diego, CA || February '20 ~ Current

I worked extensivly in the AWS ecosystem to build out various internal tools & automate several aspects of the business. Among other things, I developed a novel machine learning model.

Full Stack Developer @ LEARN Academy
San Diego, CA || November '19 ~ February '20

Pair-programmed my way through an intensive full-stack bootcamp that included 480+ hrs. of test-driven React-on-Rails application development.

Rapidly ideated, prototyped, & deployed React-on-Rails applications.

Freelance Web Developer
Orlando, FL || March '15 ~ September '19

Completed several web projects including a shopify ecommerce site.

Co-Founder, Product Manager @ the Pet Project
Orlando, FL || September '12 ~ April '14

Successfully deployed multiple apps to the iOS & Android app stores which solved problems related to pet ownership.

Owner @ Cool Robot Syndicate
Orlando, FL || August '18 ~ September '19

Developed a process to identify & capitalize on profitable arbitrage opportunities buying & selling Magic the Gathering cards at scale.

JR. Operations Manager @ 24-7 Intouch
Orlando, FL || May '16 ~ November '18

Hired, trained, & managed 3 levels of customer service operations for one of the worlds most valuable brands, including a specialized customer escalations team that I personally developed the SOP for.

Rollins College
Fall '09 ~ Summer '10
